

COLLOIDAL GOLD (CIA)

Product Description

This veterinary rapid test kit is designed for the quick and accurate detection of infectious diseases in cats and dogs. Using colloidal gold immunochromatography, it enables visual results within 5 to 10 minutes, making it ideal for point-of-care use in veterinary clinics, animal shelters, and diagnostic laboratories.

The test is compatible with whole blood, serum, or plasma samples and provides high sensitivity and specificity, ensuring dependable screening of common animal diseases such as parvovirus, adenovirus, or toxoplasmosis.

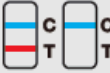

Key Features:

- User-friendly: No special training or equipment required
- Fast results: Complete the test in just 5–10 minutes
- Visual reading: Clear lines for easy interpretation
- High accuracy: Sensitive and specific detection of disease markers
- Compact format: Ideal for field use or veterinary settings

Technical Specifications:

- Technology: Lateral flow test using colloidal gold labeling
- Sample types: Whole blood, plasma, or serum
- Storage conditions: 4–30 °C (no refrigeration needed)
- Shelf life: 24 months
- Single-use cassette format
